

DELIVERABLE 3

1. Vision of the project
2. All High level Use-cases and
3. Use-case Diagram

Deadline: 24.09.10

Additional Details for Deliverable 3

- You must identify All Primary, Secondary, and Offstage Actors that apply to your project.
- Must Identify and state any assumptions made for choice of your system Boundary
- You must also create an Actor Goal List (i.e. identify all Actors and their Goals)
- Then define the High-Level Use Cases Based on the Actor Goals
- Note: All of the above forms the Procedure of Use Case Analysis, therefore must be appropriately documented in the Use Case Model

Important Note on Diagramming

- Must Use a formal CASE Tool for Diagramming
- No diagrams from MS Word or Power Point acceptable even though the diagrams can be created in those as well
- You can use Enterprise Architect
 - Version available in Course Folder
 - Crack also there.
- You can also use Rational Rose
- As long as you follow the right UML Notation doesn't matter which tool you use
- Although, All tools have slight variations in the notations they provide
- All members of the group must participate in creating diagram and mention explicitly the one they have created
